Douglasville, GA 30134

Subject: Assistance with Hazmat Specialist Courses

Dear Chief -

Once again Douglas County Fire Department has been in a position to provide assistance to us during our hazmat courses. I would like to thank you for permitting LT Kim Ransom to bring your decontamination and air sampling equipment over to demonstrate during the field portions of our Decontamination Specialist and Atmospheric Monitoring & Air Sampling courses on 20 & 22 July 2005.

The students came from as far away as Maine and Colorado; many were firefighters, and all left with a better appreciation of the roles and capabilities that departments such as yours play in hazmat operations.

Once again this was a prime example of the relationship that GTRI and Douglas County Fire has built and enhanced over the years. Cooperative efforts such as this work to our mutual benefit as well as our respective communities.

Thank you again for your support.

Sincerely,

A handwritten signature in black ink, appearing to read "Kevin Kamperman".

Kevin L. Kamperman, M.S.P.H.
Director, Hazardous Materials Training
