

## PROJECT FACT SHEET

### CHATTAHOOCHEE HILL COUNTRY REGIONAL GREENWAY TRAIL – DOUGLAS COUNTY PILOT SEGMENT

PUBLIC INFORMATION SESSION, APRIL 14, 2010

#### MASTER PLAN OVERVIEW

The Chattahoochee Hill Country Regional Greenway Trail is a proposed 98 mile regional greenway corridor that will travel along the Chattahoochee River in Douglas County, Carroll County, Coweta County, Fulton County, and the City of Chattahoochee Hills. The proposed multi-county regional trail system will enhance mobility and quality of life, will help to spur economic development within the region, and will provide an additional health benefit through recreation. The Douglas County pilot segment proposes to construct a new multi-use trail approximately 0.75 miles in length, traveling inside Boundary Waters Park. The trail will be a hard surface trail, twelve (12) feet in width, and will initially connect the existing Aquatic Center with the Athletics Hub.

#### PILOT SEGMENT QUICK FACTS

- ***Who will be able to use the trail?***  
All bicycles and pedestrians will be able to use the trail, including wheelchairs.
- ***When will I be able to use it?***  
The trail is anticipated to open in 2011.
- ***What is the project's funding source?***  
A \$500,000 Congressional Earmark has been allocated for design and construction of the pilot segment.
- ***What are the proposed project limits?***  
The trail will be about ¾-mile long and 12 feet wide, beginning near the Aquatic Center and extending toward the new Athletics Hub.

#### DOUGLAS COUNTY PILOT SEGMENT

Douglas County has received federal funding through a Congressional Earmark to design and construct the initial segment of the regional trail in the County. Through collaboration of the Douglas County Department of Transportation with the Georgia Department of Transportation, the trail is expected to be constructed in 2011.

The purpose of the Douglas County Pilot Segment of the CHC Regional Greenway Trail is to enhance the quality of life for residents and visitors. The trail will also be a valuable asset to the region, showcasing both environmental and cultural features. The trail will be accessible to the public and will preserve and enhance the natural environment for the enjoyment and appreciation of future generations. The inclusion of amenities such as signage, benches, and potentially a pond overlook area will help to create a unique experience for the trail user that will carry over to other

segments of the trail system to create a true regional trail network.

As shown by the orange line in the figure below, the trail will begin at the existing trailhead in the southwestern portion of the park, south of the Aquatic Center. It will then travel south toward the pond, then north toward the new Athletics Hub, where it will terminate at a new trailhead facility.
