Organizational
Training
Class

Course Name: Ladder Safety

Duration: 20 Minutes

Video Included: Yes

Instructor: TBD

Course Description: The purpose of this class is to teach proper ladder techniques to ensure employee safety and prevent injuries. According to experts, falls from ladders (step, straight and combo) are one of the leading causes of occupational fatalities and injuries. Each year there are 164,000 emergency room-treated injuries. This course will teach employees how to prevent ladder injuries. Topics include but not limited to:

- basic safety techniques for all ladders
- ladder inspection
- safe use
- And More
