

# Office of Risk & Safety

Organizational  
Training  
Class

**Course Name:** Confined Space & Trench Safety

**Duration:** 8 Hours

**Video Included:** Yes

**Instructor:** TBD

**Course Description:** Confined spaces can be some of the most dangerous work areas at a jobsite. This course offers training for workers exposed to, or have the potential to be exposed to, confined space hazards. Confined spaces can be found in many areas of jobsites such as manholes, pipelines, trenching, silos, storage bins, and tanks. Some topics of discussion will be:

- Jobsite safety
- Atmospheric monitoring
- Eliminate or control hazards
- Ventilation
- Proper personal protective equipment
- Ensure the space is properly shored / braced
- Be prepared for rescues
- Use good lighting
