Organizational
Training
Class

Course Name: Construction Safety

Duration: 10 Hours

Video Included: Yes

Instructor: TBD

Course Description: This course aims to present an overview of some basic construction site hazards and how employees can protect themselves. There are many safety hazards that workers may be exposed to while on the job. The objective of this course is to provide an overview on how employees can protect themselves from hazards. Topics discussed will include:

- Personal Protection Equipment (PPE)
- Job site safety
- Equipment uses and proper storing
- Trip and fall hazards
- Electrical safety
- Respiratory protection
- And More!
